

Our "Design with Discipline" approach and philosophy is a key differentiator for Progressive AE. Utilizing our proprietary Design Revolution™ tools, templates and process yields greater efficiencies and effectiveness for our clients. In conjunction with standard AIA guidelines and LEAN principles, we insist upon an integrated project delivery system that involves all key stakeholders early on in the process starting with Pre-Design through Contract Administration. This process has been developed to assure a logical sequence and development of our projects, production and coordination efficiency, cross-firm consistency and risk management.

Design Revolution™ is best described as an interactive program that embodies creativity and problem solving in order to leverage resources across geographies, focus on timeliness of deliverables, eliminate redundancies and errors, and produce sustainable and repeatable solutions.
